-----	---------------	--------	----------------	------

### Range

Expected range of returns around the benchmark in any 12-months period

Low	Low to medium	Medium	Medium to high	High
-----	---------------	--------	----------------	------

## Portfolio objective

This portfolio is managed within what Alexander Forbes Investments regards to be moderate investment parameters. The portfolio aims to provide a gross investment return above inflation - measured over any three-year rolling period. The secondary objective is to protect capital over any rolling 12 month period. Diversification is achieved by investing in equities, bonds, cash and alternative investments. Over the longer term, returns should be less volatile, but lower than for a typical balanced portfolio because of the investment strategies of the managers, which may include investment in derivative instruments.

## Manager weightings

Manager	Weight
